SATYAM KUMAR

9582906377 | satyamkmr37@gmail.com | LinkedIn | Portfolio

EDUCATION

Maharaja Surajmal Institute of Technology Dec 2021 – May 2025

B. Tech in Electronics & Communication Engineering | CGPA: 7.9 *Delhi*

TECHNICAL SKILLS

Languages: C++, JavaScript, TypeScript, SQL, HTML, CSS
Frontend: Angular, React.js, Next.js
Backend: Node.js, Express.js, NestJS
Databases: MySQL, MongoDB, PostgreSQL
Tools / Other: Git, Redis, Apache Kafka, Docker, CI/CD, Razorpay, Socket.IO, WebRTC

EXPERIENCE

MapmyIndia July 2025 – Present

Associate Software Developer

- Applied security best practices including input validation, error handling, and modular architecture to improve code quality and maintainability.
- Optimized frontend and backend pipelines, achieving 40% faster page loads and reducing server error rates.
- Implemented Redis for temporary data storage and task queuing, offloading workload from the main database and improving system responsiveness.

Comely Enterprises Pvt. Ltd. Jan 2025 – May 2025

Full Stack Developer Intern

- Built and maintained scalable cross-platform applications using Angular, AngularJS, React Native, Express.js, Redis, and MySQL; improved development efficiency by 25% through modular, reusable code.
- Designed and deployed secure RESTful APIs with Node.js and Express.js, reducing response times by 30% and ensuring high reliability under concurrent load.
- Applied Redis caching strategies and asynchronous processing to enhance system scalability and responsiveness.

PROJECTS

KuKu Fun — Full-Stack Real-Time Chat Application | Link: kuku-fun

Next.js · Node.js · Socket.IO · PostgreSQL · Redis · Kafka · Clerk · Cloudinary

- Built a scalable real-time chat system using Socket.IO with a Redis adapter for distributed presence tracking and cross-instance room routing, supporting high concurrency across multiple server instances.
- Integrated Apache Kafka for asynchronous event processing of direct messages and notifications with SASL/TLS authentication and graceful degradation to direct delivery.
- Implemented Redis-backed caching (5-min TTL) and a sliding-window rate limiter (30 DMs/10s) to reduce repeated DB lookups and prevent abuse.
- Deployed a production-grade microservice architecture on Render (Node.js) + Vercel (Next.js) with Clerk auth, Cloudinary media uploads, and Neon PostgreSQL.

Rozgars — Full-Stack Job Portal | Link: rozgars.com

Angular · Node.js · MySQL · Redis · AWS

- Built a full-stack job portal with JWT-based authentication, RBAC, and RESTful APIs serving candidates, employers, and admins.
- Developed a responsive Angular front-end with job search, application tracking, and employer posting features; built admin dashboard with AngularJS.
- Integrated Razorpay for secure payments covering courses, subscriptions, and referral payouts.
- Optimized backend with Redis caching, rate limiting, and async processing to reduce API latency and improve scalability.
